***Revised
September 2018***

THE UNIVERSITY OF KANSAS
DEPARTMENT OF CIVIL, ENVIRONMENTAL AND ARCHITECTURAL ENGINEERING
UNDERGRADUATE CURRICULUM MANUAL FOR
THE B.S. DEGREE IN CIVIL ENGINEERING

DEPARTMENTAL MISSION AND OBJECTIVES

The mission of the Civil, Environmental, and Architectural Engineering (CEAE) Department is to provide students with an outstanding engineering education and for the department to be a leader in research and service. The CEAE Department plans to achieve its mission by meeting the following three strategic objectives:

- 1) Prepare students for productive engineering careers
- 2) Maintain and grow strong research programs
- 3) Serve the profession

The civil engineering undergraduate degree program objective is:

To prepare students for professional engineering practice in the analysis, design, construction, and management of civil engineering systems and to prepare them for life-long learning.

OVERVIEW

The CEAE Department offers two bachelor's degrees. One is in civil engineering and the other is in architectural engineering. This document presents the requirements of the bachelor's degree in civil engineering. The requirements for the architectural engineering degree are available on the department web page www.ceae.ku.edu and from the department office (2150 Learned Hall).

The civil engineering degree has two areas of emphasis or concentration. The first is the general civil engineering concentration and the second is the environmental engineering concentration. The requirements for each concentration are presented in this document.

Civil engineering is a diverse field. Our curriculum provides all students with a solid foundation in a broad spectrum of civil and environmental engineering topics. Students who have a special interest in a certain area of civil engineering can pursue that interest by taking appropriate electives.

In planning your course schedule, there is need for careful analysis of your preparation and interests. The curriculum schedules in this manual are to be considered as guides only. Periodic consultation with an advisor is recommended. Here are several guidelines that should be followed in formulating class schedules:

- a) Pay attention to prerequisite sequencing to assure maximum freedom of choice of design and elective courses in subsequent semesters.
- b) Try to limit the number of credit hours per semester to no more than 18.
- c) Avoid scheduling more than four engineering courses in any semester.

Typical semester-by-semester schedules are shown on pages 10 through 14. The first schedule is for the general civil engineering concentration and the second schedule shown is for the environmental engineering concentration. These two schedules are for those students who complete all eight semesters in the civil engineering program at the University of Kansas (KU) and qualify to take MATH 125 in their first semester at KU. The third semester-by-semester schedule is for the general civil engineering concentration student who must take MATH 104 during their first semester at KU.

The fourth and fifth semester-by-semester schedules are for students who take the first four semesters at a community college or another university before transferring to KU. These schedules merely show one way in which the required and elective courses in the curriculum may be completed. Only a few students will follow one of these schedules exactly.

Civil engineering degree requirements are presented under the headings of (1) mathematics and basic sciences, (2) general education, (3) engineering sciences and introduction to design, (4) engineering analysis and design, and (5) electives in selected areas of emphasis. These areas are established in accordance with the national requirements of the Accreditation Board for Engineering and Technology (ABET). The civil engineering curriculum is fully accredited so that graduates will meet the requirements for their license as a professional engineer. The following paragraphs show how these requirements are met. Each student must satisfy the degree requirements stated in the KU Undergraduate Catalog, which is accessible online at www.catalogs.ku.edu.

KU CORE REQUIREMENTS

The civil engineering curriculum and the semester-by-semester schedules shown in pages 10 to 14 satisfy the Core requirements established by KU. Information about the KU Core and Core approved courses can be found at kucore.ku.edu. The KU Core comprises three general education (GE) goals and three advanced education (AE) goals, with a corresponding set of learning outcomes associated with each of the six goals. To satisfy the requirements of the KU Core a student must complete a total of 12 units. A KU Core unit is defined as an approved course, and approved educational experience, or an approved combination of course work and experiences.

Of the total 12 units required by the KU Core, eight are satisfied by required courses in mathematics and basic sciences, general education, and engineering analysis and

CIVIL ENGINEERING

KU CORE DISTRIBUTION

	<p><u>CRITICAL THINKING & QUANTITATIVE LITERACY</u></p> <p>GE 1.1 CRITICAL THINKING: PHSX 210 GE 1.2 QUANTITATIVE LITERACY: MATH 125</p>
	<p><u>COMMUNICATION</u></p> <p>GE 2.1 WRITTEN COMMUNICATION: ENGL 101 and ENGL 102 GE 2.2 ORAL COMMUNICATION: COMS 130, 132 or via Oral Communications Elective</p>
	<p><u>BREADTH OF KNOWLEDGE</u></p> <p>GE 3H ARTS & HUMANITIES: MEET VIA KU CORE REQUIREMENTS GE 3N NATURAL SCIENCES: CHEM 150 GE 3S SOCIAL SCIENCES: ECON 104, 142, or 144</p>
	<p><u>CULTURE & DIVERSITY</u></p> <p>AE 4.1 DIVERSITY IN UNITED STATES: MEET VIA KU CORE COURSES AE 4.2 GLOBAL AWARENESS: MEET VIA KU CORE COURSES</p>
	<p><u>SOCIAL RESPONSIBILITY & ETHICS</u></p> <p>AE 5.1 ETHICS & SOCIAL RESPONSIBILITY: MEET VIA KU CORE REQUIREMENTS</p>
	<p><u>INTEGRATION & CREATIVITY</u></p> <p>AE 6.1 INTEGRATION & CREATIVITY: CE 562 or CE 576</p>

CIVIL ENGINEERING SPECIFIC GENERAL EDUCATION REQUIREMENTS: Must complete 6 hours of English courses. Visit kucore.ku.edu/courses for approved courses and activities.

design. These eight courses (and outcomes) are PHSX 210 General Physics I (GE1.1), MATH 125 Calculus I (GE1.2), ENGL 101 Composition (GE2.1), ENGL 102 Critical Reading and Writing (GE2.1), Oral Communications (GE2.2), CHEM 150 Chemistry for Engineers (GE3N), ECON 104 Introductory Economics or 142 Principles of Microeconomics, or 144 Principles of Macroeconomics (GE3S), and CE 562 Design of Steel Structures (AE6.1). For students following the curriculum with environmental emphasis the advanced education goal 6 (AE6.1) may be fulfilled by either CE 562 Design of Steel Structures or CE 576 Municipal Water/Wastewater.

The remaining four units of the KU Core curriculum can be completed through elective courses in the Arts and Humanities (GE3A&H), Human Diversity (AE4.1), Global Awareness (AE4.2), and Ethics and Social Responsibility (AE5.1). While students are allowed to pursue approved educational experiences to satisfy the requirements of the KU Core curriculum, students are warned that educational experiences will not fulfill the CEAE curriculum requirements for the aforementioned elective courses.

CURRICULUM REQUIREMENTS

1) MATHEMATICS AND BASIC SCIENCES

A minimum of 36 hours of courses in mathematics and basic sciences is required. These courses must include 20 hours of mathematics, starting with the first course in calculus, eight hours of physics, five hours of chemistry, and a three-hour basic science elective.

The mathematics and basic sciences requirement is met as follows:

MATH 125, 126, 127, 220, 290, and 526	20 hours
PHSX 210, 216, 212, and 236	8 hours
CHEM 150	5 hours
Basic Science Elective	3 hours

If a probability and statistics course other than MATH 526 is taken, it must require calculus as a prerequisite and the course must be approved by a petition. The basic science elective must be a non-physics, non-chemistry course listed with a course code of N (natural sciences). A course in geology is recommended for students in the general civil engineering concentration. Students in the environmental engineering concentration should select a basic science elective in consultation with an academic advisor in environmental engineering.

The chemistry requirement may be satisfied by taking both CHEM 130 and CHEM 135 instead of CHEM 150.

2) GENERAL EDUCATION

Civil engineers, more than the professionals in any other engineering field, often work on projects that have wide public interest. Their designs are often large-scale and one-of-a-kind. Many civil engineering projects are constructed with public funds and subjected to public review and approval. Examples of such projects are highways, bridges, large buildings, water-supply and wastewater systems, and flood-control systems. A civil engineer needs an education that will not only provide technical proficiency but will also enhance appreciation for differing societal values and improve one's ability to explain complex technical concepts to the public.

Electives in the humanities and social sciences allow you to select general education courses that meet specific needs or interests.

A minimum of 24 hours is required in this area. The requirement is met as follows:

ENGL 101	Composition	3 hours
ENGL 102	Critical Reading and Writing	3 hours
	Oral Communications Elective (e.g., COMS 130 – 132)	3 hours
	ECON Elective (e.g., ECON 104*, 142 or 144)	3 hours
	Arts and Humanities Elective (GE3A&H)	3 hours
	Human Diversity Elective (AE4.1)	3 hours
	Global Awareness Elective (AE4.2)	3 hours
	Ethics and Social Responsibility (AE5.1)	3 hours

Credits for English composition at a foreign institution of higher education are not acceptable for the required English courses. Civil engineering students are required to complete six credit-hours of English, and for most students this will be through completion of ENGL 101 and ENGL 102. Students that have advanced placement (AP) into ENGL 102 or 105 still need to complete another three credit-hour English course. While any course that has ENGL 102 as a prerequisite is acceptable, ENGL 362 Foundations of Technical Writing is recommended as a second English course for students with advanced placement.

*ECON 104 (Introductory Economics) is a four (4) credit hour course. It provides an introduction to both microeconomics and macroeconomics.

Humanities and social science courses may be taken as general electives in addition to the required courses listed above. The humanities and social sciences courses are identified in the online timetable and in the Undergraduate Catalog with the letters H for humanities and S for social science courses. Western Civilization courses count as humanities electives.

Foreign Language. Up to six hours of foreign language courses listed as U (Undesignated Elective) in the Undergraduate Catalog will count as electives if you are not a native speaker of that language. Foreign language courses listed as H and S will count as humanities and social science elective courses.

3) ENGINEERING SCIENCES AND INTRODUCTION TO DESIGN

The Engineering Sciences area is divided into two sub-areas: Basic Engineering Sciences (3-A) and Civil Engineering Sciences and Introduction to Design (3-B):

A) Basic Engineering Sciences

A total of 25 hours is required in the Basic Engineering Sciences sub-area. The required courses are:

	CE 192	Civil Engineering Graphics	3 hours
	CE 201	Statics, and	2 hours
	CE 300	Dynamics	3 hours
or	CE 301	Statics and Dynamics	5 hours
	CE 310	Strength of Materials	4 hours

	CE 330/331	Fluid Mechanics/Lab	4 hours
	CMGT 457	Construction Project Management	3 hours
	EECS 137	Visual Basic for Engineers (recommended)	3 hours
or	EECS 138	Introduction to Computing (Topic: C++ or Fortran) (Topic: Web does not meet the CEE requirements)	3 hours

In addition to the above courses, the curriculum requires a course in one of the following areas (circuits, thermodynamics, and science of materials). This requirement can be satisfied by taking one of the following courses:

	EECS 315	Electric Circuits and Machines (recommended)	3 hours
or	EECS 316	Circuits, Electronics, and Instrumentation	3 hours
	ME 312	Basic Engineering Thermodynamics (recommended)	3 hours
or	C&PE 221	Chemical Engineering Thermodynamics	3 hours
	ARCE 350	Building Materials Science	3 hours
or	ME 306	Science of Materials	3 hours

The requirements in areas 1, 2, and 3A are the same for the general civil concentration and environmental concentration. The requirements for the area 3B (Civil Engineering Sciences and Introduction to Design) and area 4 (Engineering Analysis and Design) are different for the general civil concentration and the environmental concentration. The requirements for each concentration are stated below.

B) Civil Engineering Sciences and Introduction to Design

General Civil Concentration

The general civil concentration requires 23 hours in this sub-area. Many of these courses are prerequisites to the engineering analysis and design courses. The required courses are:

	CE 240	Geomatics	3 hours
	CE 412	Structural Engineering Materials	3 hours
or	CE 484	Materials for Transportation Facilities	3 hours
	CE 455	Hydrology	3 hours
	CE 461	Structural Analysis	4 hours
	CE 477	Introduction to Environmental Engineering & Science	3 hours
	CE 487	Soil Mechanics	4 hours
	CE 480	Introduction to Transportation Engineering	3 hours

Environmental Concentration

The environmental concentration requires 20 hours in this sub-area. The required courses are the same as for the general civil concentration except the environmental concentration does not require the transportation engineering course – CE 480. Many of these courses are prerequisites to the engineering analysis and design courses. The required courses are:

4) ENGINEERING ANALYSIS AND DESIGN

General Civil Engineering Concentration – Engineering Analysis & Design Requirements

The general civil concentration requires a minimum of 16 hours of senior design courses. The required courses are:

Structural Engineering Design – 6 hours

CE 562	Design of Steel Structures	3 hours
CE 563	Design of Reinforced Concrete Structures	3 hours

Water Resources and Environmental Design – 4 hours

CE 552	Water Resources Engineering Design	4 hours
or CE 576	Municipal Water Supply and Wastewater Treatment	4 hours

In addition to the above three required design courses, at least two more Civil Engineering Design Elective courses (six hours) must be taken from the following list:

Construction

CMGT 500	Construction Engineering	3 hours
----------	--------------------------	---------

Transportation

CE 582	Highway Engineering	3 hours
--------	---------------------	---------

Geotechnical

CE 588	Foundation Engineering	3 hours
--------	------------------------	---------

Water Resources and Environmental Design

CE 552	Water Resources Engineering Design	4 hours
or CE 576	Municipal Water Supply and Wastewater Treatment	4 hours

Environmental Engineering Concentration – Engineering Analysis & Design Requirements

The environmental concentration requires a minimum of 20 hours of senior design courses. The required courses are:

Water Resources and Environmental Design – 8 hours

CE 552	Water Resources Engineering Design	4 hours
CE 576	Municipal Water Supply and Wastewater Treatment	4 hours

Structural Design Elective – 3 hours

CE 562	Design of Steel Structures	3 hours
or CE 563	Design of Reinforced Concrete Structures	3 hours

Civil Engineering Design Elective – 3 hours

CMGT 500	Construction Engineering	3 hours
or CE 582	Highway Engineering	3 hours
or CE 588	Foundation Engineering	3 hours

Environmental Principles Elective – 3 hours

	CE 570	Concepts of Environmental Chemistry	2 hours
and	CE 571	Environmental Chemical Analysis	1 hour
or	CE 573	Biological Principles of Environmental Engineering	3 hours

Environmental Design Elective – 3 hours

	CE 574	Design of Air Pollution Control Systems	3 hours
or	CE 755	Free Surface Flow I	3 hours
or	CE 757	Pipe-Flow Systems	3 hours
or	CE 791	Waste Facility Siting and Design	3 hours

Sequence of Courses

Each of the senior design courses is the last course in a sequence of prerequisite courses. Therefore, in planning each semester's schedule, you should be sure to include the proper courses in the sequence of prerequisites. Because mathematics, physics, English, statics and dynamics are prerequisites for all of the design courses, you should complete these curriculum requirements as early as possible in your undergraduate career.

5) ELECTIVES IN SELECTED AREAS OF CONCENTRATION

A student who completes the minimum requirements in each of the four areas of the curriculum will have earned 127-128 hours in the general civil concentration and 128-129 hours in the environmental concentration (depending on the ECON choice). Both concentrations require a total of 132 hours for graduation. The remaining hours may be any courses that qualify for inclusion in one or more of the four curricular areas in accordance to the restrictions outlined below.

Mathematics and Basic Sciences: students may take elective courses designated as natural sciences and mathematics (N). Elective courses in mathematics must require MATH 126 as a prerequisite. Physics courses numbered below 210 and chemistry courses numbered below 130 are not accepted as general electives

General Education: students may take elective courses designated as humanities (H) and social sciences (S). The humanities and social sciences courses are identified in the online timetable and in the Undergraduate Catalog with the letters H for humanities and S for social science courses. Western Civilization courses count as humanities electives. English courses must have ENGL 102 as a prerequisite. Any communication studies course (COMS) may be taken as a general elective.

Area 5 is included in the curriculum to allow students to earn hours in technical subjects which would not apply in the four other curricular areas but which would contribute to your educational and/or professional goals. The following paragraphs indicate courses that may be applied to area 5, along with several courses or areas of study that may not be counted in that area.

The content of an elective course must differ substantially from the content of any course taken to fulfill a degree requirement.

Architectural Engineering. Any course numbered above 300 is acceptable.

Architecture. Up to five credit-hours of building technology and site planning courses numbered 250 or above may be used in area 5.

Business. Any course offered by the KU School of Business is acceptable. Business courses offered at other colleges or universities will be accepted only if the courses are substantially equivalent to business courses taught at KU.

Urban Planning. Any course offered by the KU Department of Urban Planning is acceptable.

Civil & Environmental Engineering. A student who wishes to study a particular civil engineering area in greater depth can take courses at the 600 or 700 level. The 700-level courses are primarily for graduate students but are open to seniors who have completed the prerequisites. The 700-level courses are not recommended for students with low grade point averages. A student not wishing to specialize can attain a broader background in civil engineering design by taking additional courses beyond the minimum requirements in area 4.

Students who start in the civil engineering program as freshmen normally will complete CE 191, Introduction to Civil Engineering, in their first semester. Credits for CE 191 are counted in area 5. Students who transfer to civil engineering after the freshman year may have completed an introductory course in another engineering discipline. Those credits are also counted in area 5. However, the credit hours from only one introduction-to-the-profession course may be applied toward graduation.

Engineering. Any course offered by the various departments of the School of Engineering is acceptable except AE 241 (Private Flight Course) and AE 242 (Private Flight Aeronautics).

Honors: courses with the honors program designation (HNRS) will be accepted as general electives.

Technical Writing. ENGL 362 (Foundations of Technical Writing) is a recommended elective course.

ROTC CREDITS

Students completing the ROTC program may count up to six hours of ROTC courses in the general education area (if related to the social sciences or humanities and in excess of the minimum 24 hours required) or as electives (if related to the physical sciences or engineering).

HONORS COURSES

Several departments, including the CEAE Department, offer honors versions of courses required in the civil engineering curriculum. Students who are eligible to take the honors courses are encouraged to do so.

<u>Required Course</u>		<u>Honors Equivalent</u>	
ARCE 350	Building Materials Science	ARCE 351	Building Materials Science, Honors
ENGL 102	Critical Reading and Writing	ENGL 105	Freshman Honors English
MATH 125	Calculus I	MATH 145	Calculus I, Honors
MATH 126	Calculus II	MATH 146	Calculus II, Honors

MATH 220	Applied Differential Equations	MATH 221	Applied Differential Equations, Honors
MATH 290	Elementary Linear Algebra	MATH 291	Elementary Linear Algebra, Honors
PHSX 210	General Physics I	PHSX 213	General Physics I Honors
PHSX 212	General Physics II	PHSX 214	General Physics II Honors
CE 310	Strength of Materials	CE 312	Strength of Materials, Honors
CE 412	Structural Engr. Materials	CE 413	Structural Engr. Materials, Honors

Honors versions of certain elective courses in humanities, social sciences, and basic sciences are also offered. Eligible students are encouraged to take honors versions of elective courses.

TRANSFER STUDENTS

Some KU civil engineers attend a community college or another university during their freshman and sophomore years followed by two years at KU to complete the BSCE degree. This document presents recommended courses to be taken during the first two years. It is a university-wide policy that a maximum of 64 hours can be transferred from a community college. If a student has completed more than 64 hours at a community college, any 64 hours may be applied towards the civil engineering degree. The remaining 68 hours needed to complete the civil engineering degree must be earned at a four-year college or university, and a minimum of 30 must be completed at the University of Kansas.

DUAL ENROLLMENT

The University of Kansas makes dual enrollment possible by allowing students to enroll in two separate academic divisions simultaneously. For example, students who wish to earn bachelor degrees in civil engineering and business may enroll in both the School of Engineering and the School of Business.

FUNDAMENTALS OF ENGINEERING (FE) EXAM

All CEE students are required to take the Fundamental of Engineering (FE) Exam prior to graduation. It is typically taken following the completion of the basic engineering science electives.

STUDENT CURRICULUM POLICY

As a student in Civil Engineering, you are required to meet the curriculum requirements in effect at the time you are admitted to the program. This manual provides guidance for completion of the degree based on the requirements as of the date listed on the cover. You may petition to meet the requirements of a curriculum adopted after you were admitted to the program, but you must satisfy all the requirements of the new program.

PHSX 210 ^H Gen. Physics I for Engineers (<i>GE11</i>)	3	MATH 290 ^H Elementary Linear Algebra	2	
PHSX 216 ^H General Physics I Laboratory	1	PHSX 212 ^H General Physics II	3	
Elective ^H Arts and Humanities (<i>GE3A&H</i>) ²	<u>3</u>	PHSX 236 ^H General Physics II Laboratory	1	
	16	Elective ^H Human Diversity (<i>AE41</i>) ²	<u>3</u>	
			18	
		<u>THIRD YEAR</u>		
CE 240 Geomatics	3	CE 455 ^S Hydrology	3	
CE 310 ^H Strength of Materials	4	CE 461 Structural Analysis	4	
CE 330/331 ^F Fluid Mechanics/Lab	4	CE 480 ^S Intro. to Transportation Engineering	3	
CE 412 ^{3,F,H} Structural Engineering Materials	3	CE 477 Intro. to Environ. Engr. & Sciences	3	
or		or		
CE 477 Intro. to Environ. Engr. & Sciences	3	CE 484 ^{3,S} Materials for Trans. Facilities	3	
MATH 220 ^H Applied Differential Equations	<u>3</u>	CE 487 Soil Mechanics	<u>4</u>	
	17		17	
		<u>FOURTH YEAR</u>		
CE 562 Design of Steel Structures (<i>AE61</i>)	3	CE 562 Design of Steel Structures (<i>AE61</i>)	3	
or		or		
CE 563 Design of Reinf. Concrete Structures	3	CE 563 Design of Reinf. Concrete Structures	3	
CMGT 457 ^F Construction Project Management	3	Elective ^H Basic engineering science	3	
MATH 526 Applied Mathematical Statistics	3	Elective Civil engineering design	3	
Elective ⁴ Civil engineering design	4	Elective Civil engineering design	3	
Electives ^H General	<u>5</u>	Elective ^H Global Awareness (<i>AE42</i>) ²	3	
	18	Elective ^H Ethics/Social Responsibility (<i>AE51</i>) ²	3	
		Required ⁵ Fundamentals of Engineering Exam	<u>0</u>	
			18	

TOTAL CREDIT-HOURS = 137

¹ Course must be designated as natural science (N) other than chemistry, mathematics, or physics.
² See the lists of acceptable General Education (GE) and Advanced Education (AE) *KU Core* courses at kucore.ku.edu.
³ Select one of the two. Students are required to take CE 412 or CE 484, but CE 477 is not optional.
⁴ One of these electives must be either CE 552^F or CE 576^S.
⁵ Taking the Fundamentals of Engineering (FE) Exam is a requirement of this program for graduation.
^(F) Courses are only offered in the Fall Semesters. ^(S) Courses are only offered in the Spring Semesters.
^(H) Honors options available. Consult with your CEAE and University Honors Program advisors for details.

TYPICAL SCHEDULE FOR TRANSFER STUDENTS
B.S. IN CIVIL ENGINEERING -- GENERAL CIVIL ENGINEERING CONCENTRATION

The following courses should be completed in the freshman and sophomore years by students who transfer to KU's Civil Engineering program from a community college. Also shown is a typical schedule of courses in the junior and senior years for transfer students. These schedules may also be used by students who transfer from a four-year college or university that does not offer an accredited program in civil engineering.

SUGGESTED FRESHMAN AND SOPHOMORE COURSES

	Cr. Hr.
Calculus I, II, and III	12
Differential Equations and Elementary Linear Algebra	5
College Physics (<u>Must</u> be Calculus-based Physics)	8
College Chemistry (<u>Must</u> be equivalent to KU's CHEM 150)	5
Basic Science Elective	3
Statics and Dynamics	5
Computer programming: Visual Basic (recommended), C++, or Fortran	3
English	6
Economics	3
Speech (Speaker-Audience Communication)	3
Humanities & Social Sciences	9
Civil Engineering Graphics (AutoCAD)	3
Sub-Total First Two Years	65

Fall Semester

Spring Semester

JUNIOR YEAR

	Cr.Hr.			Cr.Hr.
MATH 526 Applied Mathematical Stat.	3	CE 412/484	Structural/Transp. Materials	3
CE 240 Geomatics	3	CE 455	Hydrology	3
CE 310 Strength of Materials	4	CE 461	Structural Analysis	4
CE 330/331 Fluid Mechanics/Lab	4	CE 480	Intro. to Transportation Engr.	3
CE 477 Intro Environmental Engr. & Sci.	3	CE 487	Soil Mechanics	4
	17			17

SENIOR YEAR

	Cr.Hr.			Cr.Hr.
CE 562/563 Structural design course	3	CE 562/563	Structural design course	3
CE 552/576 Water design course	4	CMGT 457	Construction Project Mgmt	3
Civil engineering design elective	3		Civil engineering design elective	3
Basic engineering science elective	3		General electives	6
General electives	5			15
	17			15

TOTAL HOURS REQUIRED FOR DEGREE¹ = 132

¹ The Fundamentals of Engineering (F.E.) Exam is also a requirement of this degree program.

TYPICAL SCHEDULE FOR TRANSFER STUDENTS
B.S. IN CIVIL ENGINEERING -- ENVIRONMENTAL ENGINEERING CONCENTRATION

The following courses should be completed in the freshman and sophomore years by students who transfer to KU's Civil Engineering program from a community college. Also shown is a typical schedule of courses in the junior and senior years for transfer students. These schedules may also be used by students who transfer from a four-year college or university that does not offer an accredited program in civil engineering.
